# SL-37, 38 Type Series Safety Relief Valve (Lift Type)

# for (Pressure Vessels) (Hot Water Boilers), Heat Exchangers), Secondary Side of Pressure Reducing Valves etc.

Safety relief valve is a category of valves with functions between those of safety valves, which are mainly for steam and gases, and those of relief valves, which are mainly for liquids.

Safety relief valve can be used for fluid, steam, gas, and liquid. The metal-sheet type safety relief valve has simple structure, high corrosion resistance, and is made of high-grade materials. It is widely used as safety device for pressure vessels, machines/equipments, Hot water boilers, water/hot water supply systems, air conditioning systems, and pressure reducing valves.

The soft-sheet type safety relief valve is featured of high airtightness. It is suitable for gases and applications where leakage of valve is not allowed.

SL-37 Type Series

## SL-38 Type Series

#### PRESSURE DIVISION

| Code No. | Pressure division |  |  |  |  |
|----------|-------------------|--|--|--|--|
| 1        | 0.05~0.1          |  |  |  |  |
| 2        | Over 0.1~0.2      |  |  |  |  |
| 3        | Over 0.2~0.5      |  |  |  |  |
| 4        | Over 0.5~1.0      |  |  |  |  |
|          |                   |  |  |  |  |

(MPa)

#### FEATURES

- Bronze spring case, Stainless steel seat and disc, Stainless steel spring. A sealed type safety relief valve with high corrosion resistance.
- Suitable for three fluids, including steam, gas, and liquid (metal-sheet type).
- 1~2 sizes smaller and lighter than prior products of the same type.
